

POTATO PORTFOLIO

TONIVIT®

Biostimulant based on seaweed extract. Applicable during potato planting and early crop growth to improve root growth and early development.

REEF®

Unique liquid copper and sulfur fertilizer. Applicable to prevent sulfur and copper deficiency.

APPETIZER® DUAL

Biostimulant based on seaweed extract and amino acids. Supports crop growth and reduces leaf wear.

AGROSPRED® CITRA

Adjuvant based on organic silicone and plant extract. Enhances the effect of fungicides and insecticides.

ARY AMIN® C

Amino acid-based biostimulant. Supports crop growth and reduces leaf wear.

PROXANIL® & AXIDOR®

Fungicide with stopping action against Phytophthora infestations. In combination with preventive fungicide, it can stop visible Phytophthora infestation in leaves.

SACRON®

Fungicide based on cymoxanil with action against Phytophthora infestations. Mixing partner to strengthen fungicide scheme.

EDIPRO®

Fungicide based on propamocarb with action against Phytophthora infestations. Ideal mixing partner for strengthening fungicide schedule and resistance management.

FAZOR® & ROYAL MH® & HIMALAYA® FAZOR® FLO & ROYAL MH® FLO

Plant growth regulator (PGR) based on Maleic Hydrazide for the control of sprouting in potatoes. Applied in field it inhibits potato germination during storage.

ARGOS®

Sprout inhibitor based on orange oil. Stops potato germination during storage. Application via misting in storage shed.

SHENZI®

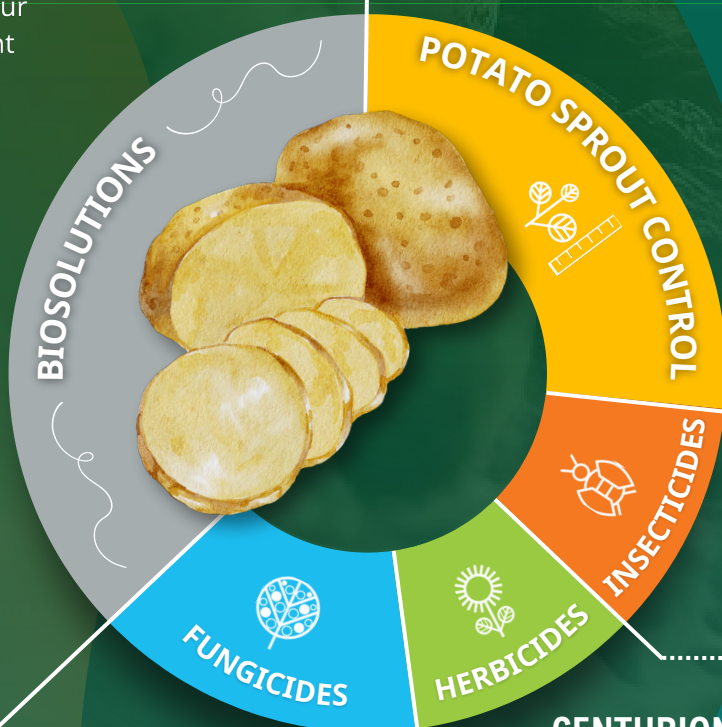

Insecticide that can be used in potatoes against the Colorado potato beetle.

CENTURION® (PLUS) & SELECT PRIM

Herbicide for grass weed control with unique effect against sprouted annual meadow grass.

DITHANE®

Fungicide based on Mancozeb with action against early and late blight that also helps prevent black scurf. Can be applied as a foliar spray or through seed treatment. Ideal mixing partner for strengthening fungicide schedule & helps manage resistance due multi-site action.
